

General Methodology for Quantifying the Greenhouse Gas Emission Reductions from the Production and Incorporation into Soil of Biochar in Agricultural and Forest Management Systems

August 14, 2009

Dear VCS,

Please accept these comments regarding the General Methodology for Quantifying the Greenhouse Gas Emission Reductions from the Production and Incorporation into Soil of Biochar in Agricultural and Forest Management Systems. If you have any questions, please contact me directly at: gthoumi@mgminter.com

Thank you,

Gabriel Thoumi
Sr. Business Development Manager
MGM International

Comment Page 1 Applicability:

Since not all soils are created equal, can the methodology provide guidance on appropriate soils and inappropriate soils that can be used with this methodology?

Comment Page 3 Technology / Measure:

3.9 please define sustainable management principles.

Comment Page 4 Boundary:

Why is the boundary only 10 years? Shouldn't it be minimum 20 years per VCS guidelines?
